UX Features for Developers

Smart Features

- Progress bar with percentage completion
- Auto-save every field
- Resume where the user left off
- Inline validation with helpful messages
- AI suggestions for text fields
- Voice-to-text input (optional)
- Mobile-responsive design
- Dark and light themes
- Keyboard navigation support

Navigation

- Previous / Next buttons on every step
- "Save & Exit" option always visible
- Step indicator (e.g., Step 4 of 12)
- Estimated time remaining

AI Assistance

- Explain each question in simple language
- Generate draft answers from uploaded documents
- Auto-fill company information using CIN or Startup India details (where available)
- Suggest improvements before moving to the next step

This flow minimizes friction while collecting high-quality information, giving founders a fast onboarding experience and creating a strong foundation for the detailed startup assessment and funding readiness journey.
